(54) MULTIMEDIA DATA MANAGING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To solve a problem that it is difficult to show the retrieved result of multimedia data having rich expressions extremely in comparison with the retrieved result of only a text in the manner desired to see by a user since it is difficult for a conventional multimedia database to recycle a retrieval index, a query and a style.

SOLUTION: By correspondently managing the retrieval index as a picture component for the user to instruct retrieval, the query as a retrieval expression and the style as a rule for converting the retrieved result for presenting the retrieved result easily to comprehend for the user, the retrieval index, the query and the style can be recycled. Thus, the user can watch the retrieved result of the multimedia data having rich expressions in the desired manner.
